Details About Edson Elementary Expanded Hybrid Learning Model

5 Days/Week In-Person Learning

- Live Teams presentation for Edson Parents/Guardians Monday, 3/15 at 7PM on TEAMS
- The information below is the proposed plan but may be subject to change based on UCDOH guideline updates
- Tentative start date Monday, April 19th (not April 12th)
- 1-hour delay start schedule (same as our present hybrid model)
- In order to accommodate more students to return to in-person learning, and follow the UCDOH social distancing guidelines, structural changes are necessary, such as merging classrooms and creating two separate learning locations, and shifting one grade level teacher from working with in-person students to working only with remote learning students
- Every grade level will have one teacher dedicated to working only with students who are 100% remote and provide daily livestream lessons, and daily guided reading, and writing.
- If you select to keep your child as 100% remote learning for the 4th marking period, once we shift to the expanded model, the teacher working with your child will reach out to you and share plans for livestream instruction, posting assignments, livestream Art, Library and Vocal Music times, and guided reading and writing
- Some students who return to in-person learning from 100% remote learning may be assigned to a different teacher for the 4th marking period due to the need to merge some classes (due to class numbers and available space) or shift students from a teacher who will be assigned the remote only students
- In-person students will remain with their “pod” of classmates. If your child is in a split class, they will work with the same teacher and teaching assistant throughout the day, and the adults will shift from one location to another
- All split classes will use an appropriate classroom space and have the same access to technology, such as document camera and white board
- Buses drop off students in the AM at 9:25AM and Walker drop-off is 9:35-9:50AM
- Live, in-person PA announcements are at 9:50AM
- Livestream Daily announcements on Teams are at 9:55AM for students who continue to work remotely
- Buses depart at 3:10PM/Walker pick-up is 3:10PM
- Students sit socially distanced on the school bus and wear masks. Siblings can sit with each other
- All students will have a tri-fold plexiglass shield at their workspace
- All students will sit at their own individual desk or sit at a table with the required social distancing space between classmates
- All students and staff will wear masks
- Classrooms are misted daily with a sanitizing spray and student tables cleaned
- If students use a classroom or computer lab computer, they are wiped down between student use
- Students are encouraged to wash their hands several times per day
- One classroom “pod” will be allowed to use the playground every day on a rotational basis so that “pods” do not mix
- Students will be provided two breaks during the school day for taking their masks off- one for eating snack (usually outside), and one an outside activity break (weather permitting)
- All students can pick up a free daily breakfast bag upon entering school and can order a free school hot lunch
- Students will eat lunch in their “pods” classroom social distanced with the windows open
- Lunch periods are 30 minutes long in the “pod” classroom. Staff bring the hot lunches to the students. Teachers will provide students with a daily opportunity to play a modified recess activity that may vary from an organized socially distanced game such as “Simon Says” to allowing students to talk to each other from an appropriate distance.
- The PE teachers will provide in-person, pull-out, PE instruction to all in-person students twice per week, and upload recorded lessons for the remote only students
- As often as possible, the PE teachers will provide instruction outside, but when the gym is used, all UCDOH guidelines are followed

*** Please understand, at this time, the UCDOH guidelines are 6 feet distance. If the social distance guidelines change to 3 feet with plexiglass portable partitions, then we may not have to split so many classes ***
